EXPERIENCE

Kasimu

JUNIOR DEVELOPER | 01/21 - 03/22 | MADRID - SPAIN

Kasimu background music for business, background music and music videos for supermarkets, stores, restaurants, hotels and venues.

- I developed the new web design with responsive design of 3 websites which were web player, control panel and song manager using React and Bulma for the UI, MobX to manage the global state and Storybook to develop and document the components.
- I developed a mobile app with React Native to play the songs and ads of businesses.
- Productive collaboration with my team to make decisions in the development and implementation of the product.
- Implementation of docker in the websites to solve the versioning problem and to be able to deploy it in containers.
- New deployment of the websites through AWS since the versions were deprecated and I was able to upgrade to Amazon Linux 2.
- Integration and configuration of CI/CD with Gitlab to automate the development and production process since it was done manually.
